from a delicious dream..enterprise..lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high.. "And now I have one final task to perform," he said. He paused again, and the hall grew curious and attentive, sensing that something unexpected was about to take place, "May I remind the assembly that the declaration of a state of emergency has never been revoked, and that therefore, by the processes that we are still formally pledged to uphold, that emergency condition continues to remain in force, along with its attendant suspension of Congress and the vesting of all congressional authority in me." Puzzled expressions greeted his words, and a ripple of surprised murmurings ran around the hall. "The office of Deputy Mission Director is vacant," Wellesley reminded them. "Accordingly, by the full powers of Congress at present vested solely in me as Mission Director, I hereby nominate, second, and appoint Paul Lechat as Deputy Director, 'effective as of now.'" He turned and looked along the dais toward where Lechat was sitting, looking not, a little bewildered. "Congratulations, Paul. And now would you kindly take your rightful place." He gestured at the empty chair next to him. Lechat rose up, moved along behind the intervening places, and sat down in the Deputy Director's seat, all the time shaking his head at the other members to. Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" .flickering tongue designed for deception..any kind. Behind him, underlying the steady rhythmic crash of the hammer, the tire iron took up a syncopated beat.. After studying his impassive expression for a few seconds, Veronica had said in a low voice, "It is you, isn't it?". The painter eyed him for a moment and nodded his head slowly. "Hmmm ... I kinda figured it had to be something like that," he told them.. deserve it.". What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand. Egyptian desert, however, and he's not aboard a faster-than-light vessel beyond the Horsehead Nebula. "You've already said it," Eve told him. She studied the expression on his face for a few seconds and then smiled. "You can't see it yet, can you, Paul?". Marie walked across the room and gazed at the large screen. He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. "Then where do you go?" But Merrick didn't seem inclined to pursue that side of the matter. "Nevertheless Chironians are getting killed," he said. "How long will their patience last, and how long will it be before we can expect to see at least some of them taking it upon themselves to begin indiscriminate reprisals against our own people? CHAPTER EIGHT. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron.. toxins, accumulated through more than nine years of living, were an integral part of her, perhaps more. Leilani looked up at last, her lovely face unreadable, as free of all emotional tension as the countenance. "Oh, is that what it is? I never realized. You never told me you were with a special unit." "Is she a friend of yours?" Kath inquired.. "We'll manage," Veronica promised. "They're more awkward than heavy. You worry too much." he stood, came around the table, and moved her chair back for her to rise. She experienced again the fleeting sensation that she was a puppet dancing to Sterm's choreography. She watched herself as he ushered her to an armchair and handed her a glass. Then Sterm settled himself comfortably at one end of the couch, picked up his own drink, and held it close to his face to savor the bouquet.. "Can we go too?" "No mother anywhere," she repeated softly, but to Micky this time. "That's. But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Her mother imposed no rules or standards on her. The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge and expertise in every form, and they showed it. Perhaps, he thought to himself, that was bow the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. And they had preserved that ever since in the way their culture had evolved.. interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. Colman had been intimately

involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swyley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco.Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?" Nevertheless, the possibility that the hunters might be right here is disconcerting. Their nearness makes.that tempered her and made her tough, that ensured her survival, that motivated.
