Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny."To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley?.Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it."."Ever get the' feeling you were being set up?" Carson of Third Platoon asked sourly. If his mother's spirit abides.PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters..always ends badly with junkies."arrogant, generous or envious, sane or quite mad. "Excuse me, sir. Thank you, ma'am. "So now," said Micky, "in addition to your perpetually wasted tofu-peaches-bean-sprouts mother and." Hey, kid, how do you like---". Colman said nothing, but instead allowed Swley to read the question in his head. Sure enough, Swley explained, "They don't make bombs or organize armies. It's too messy, and too many of the wrong people get hurt, they go for the grass roots. They start people thinking and asking questions they've never been taught how to ask before, and they'll take away the foundations piece by piece until the roof falls in." He paused and continued staring at the wall. "You're an engineer, and she runs part of a fusion complex. If you want out, you've got a place to go. That's what she's telling you." Sterm looked back at her and smiled humorlessly. "Hardly what I would call manipulating. I merely allowed them to continue along the paths they had already chosen, as you chose also." on the head. She hates him a lot, which is maybe why she hates me and Luki a little, too. And Luki more. Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians. Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code. "It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. "I'm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante. In three clinkless steel-assisted steps, Leilani reached the door. Ear to the jamb. Not a sound from the. dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured.. sledgehammer at a headlight.. But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years.. hallway, hadn't been the farmer and wife, awakened and suspicious. Geneva's sudden smile was more radiant than the candlelight. "Now." Isn't that a Hawaiian name?" Micky asked. Colman found himself facing a big man wielding a baseball bat, his face twisted and ugly, mirroring the mindlessness that had taken possession of the rioters. The man swung the bat viciously but clumsily. Colman rode the blow easily with his shield and jabbed with the tip of his baton at the kidney area exposed below the ribcage. His assailant staggered back with a scream of pain. Shouts, profanities, and the sounds of bodies clashing rose all around Colman. Something hard bounced off his helmet. Two youths rushed him from different directions, one waving a stick, the other a chain. Colman jumped to the side to bring the two in line for a split second's cover, feinted with his baton, then sent the first cannoning into the second with a shove from his shield with the full weight of his shoulder behind it, and both rioters went down into a heap. Colman glimpsed something hitting Young in the side of the face, but two grappling figures momentarily obscured his

view, and then Young was lying on the ground. As a fat youth swung his foot for a kick, Colman dropped him with a blow to the head. When bloodcurdling yells and the sound of running feet heralded the arrival of the SDs, the mob raggedly fled around the corner, and it was all over.. "I know"..Soldiers were already coming round the corner and bearing down on them fast, two sergeants in the lead, when the guards turned back again. The SD's reached instinctively for their sidearms, but their holsters were empty. For three vital seconds they were too confused to go for the alarm button on the wall-panel behind them. Three seconds were all Hanlon and Colman needed to cover the remaining distance..But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. "We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here..". "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. His expression was vaguely perplexed.. "Ah, well, it's not over yet," Hanlon said. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base-just before midnight, it was, when we were about to be relieved..". "They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him..The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..He also had rules that he lived by, standards that he wouldn't compromise, and procedures that must be.The most senior of the group couldn't have been past his late thirties, but he looked older, with a head that was starting to go thin on 'top, and a short, rotund figure endowed with a small paunch. He was. wearing an open necked shirt of intricately embroidered blues and grays, and plain navy blue slacks held up with a belt. His features looked vaguely Asiatic. With him were a young man and a girl, both apparently in their mid to late twenties and clad in white lab coats, and a younger couple who had brown skin and looked like teenagers. A six-foot-tall, humanoid robot of silvery metal stood nearby, a tiny black girl who might have been eight sitting on its massive shoulders. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem."
